SUMMARY

Passionate QA professional with a front-end development background and hands-on experience in software testing. Skilled in requirement analysis, test design, functional testing, API testing, and defect management. Deeply interested in IT process quality, compliance, and IT governance. Eager to contribute to product quality and user experience, with a strong aspiration to continuously learn and advance toward an **Automation Tester** role.

PROFESSIONAL EXPERIENCE

Manual Tester & Front-end Developer (OJT Program)

01/2024 – 04/2024

FPT Software

Requirement Analysis & Test Planning: Analyzed project requirements and collaborated with the development team to define testing scopes for **3+ sprint cycles**.

Test Design: Designed and maintained **200+ detailed manual test cases** covering functional, integration, and UI/UX scenarios.

Test Execution & Regression: Executed **100% of planned test cases** and performed rigorous regression testing after bug fixes, achieving a **95% test pass rate** before major releases.

Defect Management: Identified, recorded, and tracked **50+ defects** in Jira with clear reproduction steps and screenshots, contributing to a **20% decrease** in critical post-release bugs.

API Testing: Validated **30+ backend APIs** using Postman & Swagger, rigorously verifying status codes, response times, and data accuracy.

Tools & Environment: Jira, Postman, Swagger; Agile methodology.

PROJECTS

BFarmX - Clean Agricultural Production

01/2025 – 05/2025

Manual Tester, Front-end Developer - Team: 5

Description: A digital traceability platform aligned with VietGAP standards, managing crop cultivation and harvesting via blockchain integration.

Test Design & Execution: Designed **150+ test cases** for cultivation modules; executed cross-platform functional testing across Web and Mobile environments.

Defect Tracking: Detected and reported **40+ issues**, collaborating closely with developers to achieve a **90% bug fix verification rate**.

API Verification: Conducted API testing for **20+ endpoints** to ensure seamless data transparency and compliance with blockchain security standards.

Tools: Postman, Swagger, Jira.

FService - Subscription Service

09/2023 – 12/2023

Front-end Developer & Tester - Team: 4

Description: A platform for Vinhomes Grand Park residents to purchase apartment services and pay online via VNPAY.

UI/UX & E2E Testing: Validated UI against Figma designs for **15+ application screens**; performed comprehensive end-to-end testing of the VNPAY integration, ensuring **0 critical payment bugs** leaked to production.

Compatibility Testing: Verified cross-browser compatibility across Chrome, Edge, and Safari to ensure a consistent user experience.

Tools: Figma, Jira, Swagger.

Math Utility Library

09/2023 – 12/2023

Tester - Personal Project

Description: A Maven-based math utility library.

Unit & Automation Testing: Developed and executed **50+ unit tests** utilizing JUnit.

Test Coverage: Applied data-driven testing strategies against boundary values and edge cases, achieving over **80% code coverage**.

Tools: Java, Maven, JUnit, GitHub Actions (CI/CD).

SKILLS

Testing: Manual Testing (Web/Mobile). | Test Case Design & Execution. | API Testing (Postman, Swagger). | Bug Tracking (Jira, Trello). | Basic Automation (Java + JUnit). | STLC / SDLC.

Technical: Java (OOP). | MS SQL Server. | HTML/CSS. | JavaScript. | Git. | Figma.

Soft Skills: Attention to Detail. | Analytical Thinking. | Clear Communication. | Team Collaboration. | Time Management.

EDUCATION

FPT University

08/2021 – 08/2025

Bachelor of Software Engineering

IELTS:

6.0

CERTIFICATES

Coursera: Managing Project Risks  | Project Management Project  | Understanding User Needs  | Academic English: Writing
